

## Moore's 1.2M Unidrill

**5995.00 +VAT**

Moore's 1.2M Unidrill A reliable, straightforward seed drill suited to a wide range of applications — from sports pitch renovation and estate grassland management through to smallholding and farm use. The 1.2m working width makes it a practical choice for tractor-mounted work where a mid-size drill is needed without the cost or complexity of a larger machine. Simple to use, easy to set up and built strong and rugged. Also has hydraulic raise and lower to allow transport the seeder to be transported easily on the rear wheels. Well suited to groundsmen, greenkeepers, smallholders, farmers, estate managers and landscape contractors. Key features: ? 1.2m working width — practical for compact tractors and varied plot sizes ? Accurate seed metering for even distribution and good establishment rates ? Solid steel construction — handles rough or compacted ground reliably ? Compatible with grass seed, wildflower mixes, cereals and cover crops ?? Simple seed rate adjustment — easy to calibrate in the field ? Standard 3-point linkage — fits most compact and utility tractors ? Low soil disturbance — suitable for overseeding and renovation work ? Low maintenance with straightforward servicing £5995.00 plus vat Delivery Available
